RUBBER TILE FLOOR: Safety Data Sheet (MSDS) CONTINUED

According to the Hazard Communication Standard from OSHA, MSDS's are required for all hazardous chemicals; however, the standard specifically exempts all "articles" from this requirement (29CFR 1910.1200 (b) (5) (IV)). "Article" by definition of the standard, is a manufactured item, which is formed to a specific shape or design during manufacture; which has end use functions dependent on its shape or design; and which does not release a hazardous chemical under normal conditions of use. All Allstate MVT falls under the "Articles" definition and therefore is exempt. Although not necessary, we have prepared the above MSDS sheet that covers all Allstate Tile products. All terms and specifications are subject to change without notice.
